TUSKER CONSTRUCTION SAFETY

A wide range of versatile solutions for construction safety

Tusker Industrial Safety offer a range of safety solutions to support your construction project. Our products can be supplied to your exact requirement including specific sizing and finishing.

Debris netting

We supply a wide range of debris netting which is designed to protect the public and traffic from falling debris. The netting allows air to pass through, therefore reducing the wind loading on scaffolding. Available as a flame retardant option.

Scaffolding and heavier duty grades available.

Skip mesh

FR Skip mesh in blue or green available on a roll.

Monarflex sheeting

We supply Monarflex, the high quality, flame retardant market leading range of scaffold sheeting and tarpaulin.

The range includes:

- Monarflex Scaffband Flamesafe Scaffold Sheeting
- Monarflex Stripe FireSmart Scaffold Sheeting
- Monarflex IsoScaff FR Scaffold Sheeting
- Monarflex Super T Plus FireSmart Scaffold Sheeting
- Monarflex Scaffband Clear Scaffold Sheeting

Monarflex Scaffband Clear

- For medium term use
- Eyelets reinforced with HDPE filament tapes
- Lightweight for easy handling on site
- Also available in a fire retardant option
- Suitable for screen printing

Monarflex IsoScaff FR

- Cost effective
- Flame retardant
- UV stabilised
- High light transmission
- Eyelets reinforced with HDPE filament tapes
- Lightweight for easy handling on site
- Suitable for screen printing

Monarflex Stripe FireSmart

- Flame retardant
- Suitable for internal or external use. Certified to LPS 1207 and LPS 1215
- Band reinforced with HDPE filament tapes
- Lightweight for easy handling on site
- Suitable for digital printing or screen printing

Monarflex Scaffband Flamesafe

- Flame retardant approved to LPS 1215 (external) unprinted or screenprinted.
- Lightweight for easy handling on site
- Eyelets reinforced with HDPE filament tapes
- Choice of high performance flexities or euroties fixing systems
- Suitable for screen printing

Monarflex FireSmart Super T Plus

- Flame retardant
- Suitable for internal and external use. Certified to BRE KPCBfire retardant class KPS 1207 and LPS 1215
- Unique high performance Anchor and Strap fixing systems resist wind induced stresses
- Can be used for all types of long term projects exceeding 12 months
- Can be applied vertically and horizontally
- Suitable for screen printing

TUSKER CONSTRUCTION SAFETY

Fire retardant tarpaulin

If you're looking for fire retardant tarpaulin for your construction project, we can help. Our laminated PVC coated tarpaulin fabrics can be sewn to your specific size and finishing options. Available in blue, yellow, pink, black and white options.

Temporary window protection

The Tusker Internal Window Protection system is a bespoke, translucent solution that will protect window installations of any size. The system protects windows during construction against dirt, dust, mortar, scratches, paint and plaster and is also fire retardant. The system is available with a range of of fixing options including eyelets, velcro and press studs.

- Suitable for window protection in construction environments
- Lightweight and easy to install
- Fire retardant
- Protects from dust, scratches, paint etc.
- Free design services - bespoke solution for any project
- Heavy duty - temporary but long lasting up to 10 years.
- **Range of fixing options available to best suit requirements**

Magnesium Oxide Board

MGO board is an innovative medium density, multi-purpose magnesium oxide board, highly durable and non-combustible. Suitable for use in range of applications requiring a combination of sound insulation, moisture and thermal resistance as well as superior performance in fire.

MGO board can be used as an alternative to chipboard, plywood or wood based cement particle board, where greater dimensional stability is required. MGO board will accept a variety of painted and polished finishes i.e paints, tiles, veneers, laminates etc.

With options for up to a 2 hour fire resistance, Magnesium Oxide Board offers an innovative passive fire protection alternative for your construction projects.

- Non-combustible with up to a 2 hour fire rating
- Moisture/water/rot resistant
- Efficient cutting method - cut to size using hand/power saw or score and snap
- Easy to fix - simply hammer and nail or screw fix without the need for pre-drilling

Range of 5 different options to suit your application. Ask our technical team for more information.
