Tusker Industrial Safety design, manufacture and supply an extensive range of mobile frames and flame retardant curtain materials suitable for use in all welding and fabrication processes.

Tusker frames offer a wide choice of mobile screens which when combined with Tusker curtains, offer excellent protection against harmful levels of UV light as well as sparks.

All frames are available in a number of standard sizes and can be manufactured to customer requirements. Your company branding can be added to curtains and frames can be coloured to match corporate requirements.

Heavy Duty Frames: HD Series

Constructed from 35mm box section steel for strength and powder coated for a robust finish.

Features a top track section specially formed to suit Tusker

hooks that are strong enough for all welding curtains and strips.

Hinged extension arms, uprights, horizontal supports and castors are available to allow users to extend frame contraction. All connection points are flow drilled and threaded for fast, solid assembly. Supplied in Orange.

Stand-alone Frames: ST Series

A heavy duty frame which quickly slots together. Constructed from 35mm box section and powder coated for a robust finish. Suitable for use with Tusker curtains and strip range, with the curtain fitted over the uprights. Castors are available for extra mobility. Supplied in Orange.

Economy Frames: RF Series

A practical, lightweight and easy to assemble portable frame system. Manufactured from galvanised steel with a specially formed 19mm box section to give extra strength.

Suitable for use with Tusker curtains which fit over the uprights. All frames can be extended by links, and castors are available for extra mobility.

Elephant Frames: EL Series

Tusker elephant frames are ready assembled foldaway mobile shelters. Manufactured from galvanised steel and available with our range of flame retardant covers for both welding and non-welding applications.

Welding Curtains

Lowvis Green LV1
Reinforced for extra strength and tear resistance. Recommended for applications where no visibility is required.

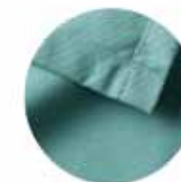

Safearc Amber SA1
Safearc Bronze SA2
Reinforced for extra strength and tear resistance. Recommended for applications where a degree of visibility is required.

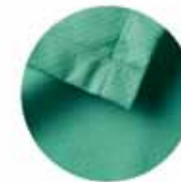

Hivis Amber
A translucent PVC welding curtain recommended for all welding applications where a good degree of visibility is required.

Weld-Green TWG1
A dark green PVC welding curtain recommended for all applications where a low degree of visibility is desired.

Canvas CAN1
Traditional, flame retardant material for use as welding screens and covers. For indoor use only.

Heavy Duty Canvas HDCAN
As CAN1, but waterproof and rot-proof. Suitable for both indoor and outdoor applications.

Jute EJ1
Closely woven natural material. A cost-effective alternative to traditional canvas. Suitable as a light duty welding screen cover. Indoor use only.

Neogard 250
660gms. Neoprene coated fibreglass material for use as a heavy duty welding/grinding screen or smoke barrier. No visibility.

Neogard 400
850gms. Neoprene coated fibreglass material for use as a heavy duty welding/grinding screen or smoke barrier. No visibility.

Non-Welding Curtains

Transgreen TG1
A reinforced, translucent PVC suitable for applications where a degree of visibility is required. Not suitable for arc welding.

Glass Clear GCL1
Suitable where total visibility is required. Typical applications include paint spray booths and dust protection.

Opaque OPFR
Reinforced for extra strength and tear resistance. Typical applications include paint spray booths and dust protection.
